Notebook 3 — Business Results & Insights

Predictive Logistics Engine — Mumbai Fleet Simulation

What this notebook shows:

1. **On-Time Delivery Rate** — Static routes vs Dynamic routing (99% OTD target)
2. **Friday Variance** — Speed optimisation vs Variance optimisation side by side
3. **Van #402 Decision Timeline** — The 30-second clock as a real chart
4. **Fuel Savings** — Dynamic routing vs static baseline
5. **Fleet Health Dashboard** — Sensor analytics across 100 vans

Run Notebooks 1 and 2 first.
